- I was assigned to make a dynamic website using React framework bootstrap5, HTML5, CSS and JavaScript and for the the backend I used PHP NodeJS (Database)

Internee

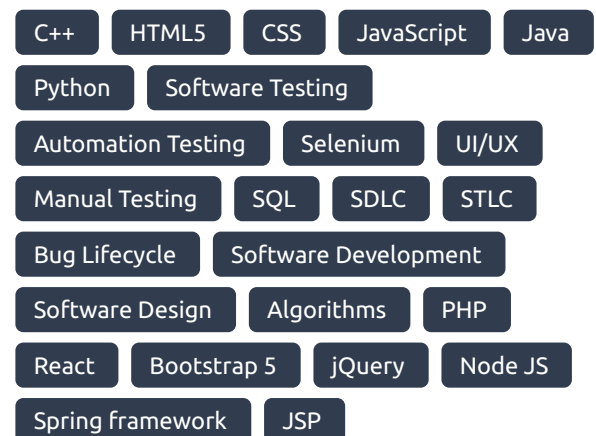

The App Makers

06/2021 - 07/2021

Achievements/Tasks

- Web Development

SKILLS

PERSONAL PROJECTS

CGPA and GPA Calculator

- It was my 2nd semester project and I used C++ programming language for this with the concepts of object oriented programming OOP.

Flight delay and Cancelation

- I made this project in my 3rd semester using the concepts of Data Structures in C++ programming language. In this project I have worked on the big data handling 1 GB .csv file.

University Webpage (Freelance Project)

- Designed a sample web page for a university.

Hospital Management System

- This project is a responsive web application for hospital management including admins, doctors and patients. We made it in Java JSP and Servlets, integrated with database

Food Delivery Management System

- It was a dynamic website using React framework bootstrap5, HTML5, CSS and JavaScript and for the the backend I used PHP NodeJS (Database)

Automation Testing

- We used Selenium for our automation testing and tested hospital management system(Java) designed several test cases.

Portfolio Website

- I made my personal portfolio website on React.js using different libraries for animation. Here's the link to my website: <https://fatima-malikk.github.io/Portfolio-Website/>
